

Ice Tower Excavation

You will need:

A long/tall container
Colorful trinkets like beads, shapes, marbles, etc.

Instructions:

- ✓ Fill the container with clear water and drop the toys in it.
- ✓ Put the bottle in the freezer, until the water turns into a block of ice.
- ✓ Ease the ice tower out of the bottle and give the child squeeze bottles, salt, and eye droppers as tools to melt the ice and rescue the trinkets.

Quick Tip:

Pick a container which is uniform, throughout, in width. That way, getting the ice tower out of the container becomes easier.
