

Make your own Moon Sand

Emotional: #2.3 Self Esteem

Cognition: #4.5 Inquiry

#4.7 Measuring Length, Weight, Capacity, Temperature, Time and Money

Supplies:

- 8 cups of flour
- 1 cup of oil
- Food colouring (any colour)
- A mixing bowl
- A container
- Spoon

Instructions:

1. First, mix the flour and oil together in a mixing bowl. This can be done with the children's hands or a spoon.
2. Once you have mixed it and it is smooth, add food colouring (a little at a time until it makes the colour you want).
3. Now, you can put it in a container.

WONDERING WHAT TO DO NEXT!

You can put measuring cups, spoons, straws and other items into a bin for the children to explore and mold the sand.

If you would like to keep it for the next day, you can store it in an airtight container

Hope you enjoy!!
