

## DIY RECYCLED MARBLE TRACK

**Elect:** 1.1 Friendship - Emerging social hierarchies.

1.2 Conflict Resolution and Social Problem solving Skills - Identifying solutions to conflict; making logical connections between actions and consequences; problem solving in the face of difficulty.

1.3 Co-operation - Co-operating and sharing frequently.

1.6 Taking Another's Point of View - Understanding the point of view of others and using this to regulate their own behavior understanding that others think, believe or feel differently from self.

### **Materials:**

- Paper towel rolls, egg cartons, yogurt containers...basically anything in your recycling bin!
- Masking or painters tape
- Scissors
- Marbles, large beads or a small ball
- Duct tape (optional)

### **Instructions:**

- Explore your materials; place them out on the floor near an empty wall. Figure out which ones will work in certain areas and what needs to be modified (cut, taped together.)
- Start with one section, tape one item to the wall and keep adding above or below it.
- Trial and Error: Test each section as you go to make sure it's working.
- Keep adding until you've either run out of wall space or materials!
- Evaluate and readjust: Keep testing, adding

and making adjustments:

- How can you make it a smoother run?
- Can you add barriers or more walls?
- Can you add some kind of obstacle?

**BUILD, GET CREATIVE AND ENJOY!!**
